

수능 유형 영어 문제지 (20지문 × 7유형 = 140문항)

구성: 지문마다 7문항을 다음 순서로 출제함.

1. 주제 2. 요지 3. 내용 일치 4. 어법 5. 어휘 6. 요약 7. 글의 순서

- 문항 1·2·3·6은 각 지문 맨 위의 **원문**을 읽고 푼다.
- 문항 4(어법)·5(어휘)·7(글의 순서)은 해당 문항에 실린 **변형 지문**을 읽고 푼다.
- 문항 번호는 1번부터 140번까지 연속이며, 답안지는 answer_key.md에 따로 있다.

지문 1. 4강 E-1

[원문]

One of the main obstacles in anyone's quest for longevity is the fact that the skills that my colleagues and I acquired during our medical training have proved to be far more effective against fast death than slow death. We learned to fix broken bones, wipe out infections with powerful antibiotics, support and even replace damaged organs, and decompress serious spine or brain injuries. We had an amazing ability to save lives and restore full function to broken bodies, even reviving patients who were nearly dead. But we were markedly less successful at helping our patients with chronic conditions, such as cancer, cardiovascular disease, or neurological disease, evade slow death. We could relieve their symptoms and often delay the end slightly, but it didn't seem as if we could reset the clock the way we could with acute problems. We had become better at catching the eggs, but we had little ability to stop them from falling off the building in the first place.

1. 다음 글의 주제로 가장 적절한 것은?

- ① how antibiotics revolutionized the treatment of infections
- ② the importance of emergency care for patients near death
- ③ the limits of modern medicine in preventing chronic, slow death
- ④ why medical training should focus on surgical skills
- ⑤ ways to reset the biological clock through lifestyle changes

2. 다음 글의 요지로 가장 적절한 것은?

- ① 의료진은 환자의 증상 완화보다 생명 연장에 우선순위를 두어야 한다.
- ② 현대 의학은 급성 질환에는 뛰어나지만 만성 질환으로 인한 죽음을 막는 데는 한계가 있다.
- ③ 응급 의학의 발전으로 인간의 평균 수명이 크게 늘어났다.
- ④ 만성 질환 치료를 위해서는 더 강력한 약물 개발이 필요하다.
- ⑤ 의사는 자신이 배운 기술의 효과를 과신하지 말아야 한다.

3. 다음 글의 내용과 일치하지 않는 것은?

- ① 필자와 동료들은 의학 교육에서 습득한 기술로 급성 문제에 잘 대처할 수 있었다.
- ② 필자는 암이나 심혈관 질환 같은 만성 질환의 진행을 완전히 되돌릴 수 있었다.
- ③ 필자는 골절 치료, 항생제 사용, 손상된 장기 교체 등을 배웠다.
- ④ 필자는 거의 죽음에 이른 환자를 소생시킬 수 있는 능력을 갖추었다.
- ⑤ 필자는 만성 질환 환자의 증상을 완화하고 죽음을 다소 늦출 수는 있었다.

4. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

One of the main obstacles in anyone's quest for longevity is the fact that the skills that my colleagues and I acquired during our medical training ①has proved to be far more effective against fast death than slow death. We learned to fix broken bones, ②wipe out infections with powerful antibiotics, support and even replace damaged organs, and decompress serious spine or brain injuries. We had an amazing ability to save lives and restore full function to broken bodies, even ③reviving patients who were nearly dead. But we were markedly less successful at helping our patients with chronic conditions, such as cancer, cardiovascular disease, or neurological disease, ④evade slow death. We could relieve their symptoms and often delay the end slightly, but it didn't seem as if we could reset the clock ⑤the way we could with acute problems. We had become better at catching the eggs, but we had little ability to stop them from falling off the building in the first place.

5. 다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은?

One of the main ①obstacles in anyone's quest for longevity is the fact that the skills that my colleagues and I acquired during our medical training have proved to be far more effective against fast death than slow death. We learned to fix broken bones, wipe out infections with powerful antibiotics, support and even replace damaged organs, and decompress serious spine or brain injuries. We had an amazing ability to save lives and ②restore full function to broken bodies, even reviving patients who were nearly dead. But we were markedly ③less successful at helping our patients with chronic conditions, such as cancer, cardiovascular disease, or neurological disease, evade slow death. We could ④worsen their symptoms and often delay the end slightly, but it didn't seem as if we could reset the clock the way we could with acute problems. We had become better at catching the eggs, but we had ⑤little ability to stop them from falling off the building in the first place.

6. 다음 글의 내용을 한 문장으로 요약하고자 한다. 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?

Doctors trained in modern medicine are highly (A) _____ at treating acute problems, but they remain largely (B) _____ against chronic diseases that lead to slow death.

	(A)	(B)
①	cautious	effective
②	capable	successful
③	reluctant	powerless
④	reluctant	effective
⑤	capable	powerless

7. 주어진 글 다음에 이어질 글의 순서로 가장 적절한 것을 고르시오.

One of the main obstacles in anyone's quest for longevity is the fact that the skills that my colleagues and I acquired during our medical training have proved to be far more effective

against fast death than slow death.

(A) But we were markedly less successful at helping our patients with chronic conditions, such as cancer, cardiovascular disease, or neurological disease, evade slow death. We could relieve their symptoms and often delay the end slightly, but it didn't seem as if we could reset the clock the way we could with acute problems.

(B) We had become better at catching the eggs, but we had little ability to stop them from falling off the building in the first place.

(C) We learned to fix broken bones, wipe out infections with powerful antibiotics, support and even replace damaged organs, and decompress serious spine or brain injuries. We had an amazing ability to save lives and restore full function to broken bodies, even reviving patients who were nearly dead.

① (A)-(C)-(B) ② (B)-(A)-(C) ③ (B)-(C)-(A) ④ (C)-(A)-(B) ⑤ (C)-(B)-(A)

[원문]

Economists like teaching about taxes and subsidies because they don't "stick" where they "land". Some of a tax's burden or a subsidy's benefit passes from those who write or cash the check to other market participants because taxes and subsidies change people's behavior. Buyers might bear the brunt of a tax legally paid by sellers and vice versa. Who is legally responsible for writing the check doesn't matter. How suppliers and demanders respond to changing prices does. Cigarette buyers tend to be less price-sensitive than sellers. When large tobacco companies get taxed, the cigarette supply shrinks. Smokers pay higher prices, but most don't cut back much because they aren't especially price-sensitive. Cigarette taxes land on huge corporations with a great amount of cash but stick to disproportionately poor smokers.

8. 다음 글의 주제로 가장 적절한 것은?

- ① why the burden of a tax is determined by price sensitivity rather than legal liability
- ② the role of government subsidies in reducing income inequality
- ③ how tobacco companies avoid paying corporate taxes
- ④ economic reasons for the declining number of smokers
- ⑤ the difficulty of teaching economic concepts to students

9. 다음 글의 요지로 가장 적절한 것은?

- ① 담배세는 대기업의 수익을 줄여 담배 공급을 효과적으로 억제한다.
- ② 정부는 저소득층의 세금 부담을 줄이기 위해 보조금을 늘려야 한다.
- ③ 소비자는 세금 인상에 민감하게 반응하여 소비를 줄인다.
- ④ 세금의 실제 부담은 법적 납부자가 아니라 가격 변화에 대한 반응 정도에 따라 결정된다.
- ⑤ 경제학 교육은 실생활의 사례를 활용할 때 가장 효과적이다.

10. 다음 글의 내용과 일치하지 않는 것은?

- ① 세금이나 보조금은 사람들의 행동을 변화시킨다.
- ② 판매자가 법적으로 내는 세금을 구매자가 부담할 수도 있다.
- ③ 담배 구매자는 판매자보다 가격에 더 민감하다.
- ④ 대형 담배 회사에 세금이 부과되면 담배 공급이 줄어든다.
- ⑤ 대부분의 흡연자는 가격이 올라도 흡연량을 크게 줄이지 않는다.

11. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

Economists like teaching about taxes and subsidies because they don't "stick" where they "land". Some of a tax's burden or a subsidy's benefit ① passes from ② those who write or cash the check to other market participants because taxes and subsidies change people's behavior. Buyers might bear the brunt of a tax ③ legally paid by sellers and vice versa. Who is legally responsible for writing the check ④ doesn't matter. How suppliers and demanders respond to changing prices ⑤ do. Cigarette buyers tend to be less price-sensitive than sellers. When large tobacco companies get taxed, the cigarette supply shrinks. Smokers pay higher prices, but most don't cut back much because they aren't especially price-sensitive. Cigarette taxes land on huge corporations with a great amount of cash but stick to disproportionately poor smokers.

12. 다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은?

Economists like teaching about taxes and subsidies because they don't "stick" where they "land". Some of a tax's burden or a subsidy's benefit passes from those who write or cash the check to other market participants because taxes and subsidies ① change people's behavior. Buyers might ② bear the brunt of a tax legally paid by sellers and vice versa. Who is legally responsible for writing the check doesn't matter. How suppliers and demanders respond to changing prices does. Cigarette buyers tend to be ③ more price-sensitive than sellers. When large tobacco companies get taxed, the cigarette supply ④ shrinks. Smokers pay ⑤ higher prices, but most don't cut back much because they aren't especially price-sensitive. Cigarette taxes land on huge corporations with a great amount of cash but stick to disproportionately poor smokers.

13. 다음 글의 내용을 한 문장으로 요약하고자 한다. 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?

Because taxes and subsidies alter behavior, their real burden or benefit is (A) _____ to market participants other than the legal payer, depending on how (B) _____ each side is to price changes.

	(A)	(B)
①	limited	responsive
②	shifted	responsive
③	shifted	indifferent
④	limited	hostile
⑤	returned	indifferent

14. 주어진 글 다음에 이어질 글의 순서로 가장 적절한 것을 고르시오.

Economists like teaching about taxes and subsidies because they don't "stick" where they "land". Some of a tax's burden or a subsidy's benefit passes from those who write or cash the check to other market participants because taxes and subsidies change people's behavior.

(A) Smokers pay higher prices, but most don't cut back much because they aren't especially price-sensitive. Cigarette taxes land on huge corporations with a great amount of cash but stick to disproportionately poor smokers.

[원문]

Research findings can inject life into an idea in a way that helps us to appreciate its significance and plausibility. In this sense, research in the social sciences can function like photographs in journalism. They move us to consider a point of view. My introduction to Skinnerian reinforcement theory was just of this sort. Although prepared to resist the theory on intellectual and political grounds, as I watched the professor use food pellets to bring the random movements of a pigeon under his control, I couldn't escape the power of the behaviourist perspective. Its plausibility will always remain with me. By the same token, Piaget's famous experiments with children's problem-solving do not furnish us with the truth about human development. However, they draw our attention to significant alternatives to behaviourism in understanding children's learning.

15. 다음 글의 주제로 가장 적절한 것은?

- ① the conflict between behaviourism and Piaget's theory
- ② ethical problems in experiments using animals
- ③ the role of photographs in modern journalism
- ④ the power of research findings to make ideas vivid and persuasive
- ⑤ why social science cannot produce objective truth

16. 다음 글의 요지로 가장 적절한 것은?

- ① 연구 결과는 진리를 확정하기보다 하나의 관점을 생생하게 보여 주어 그 의의를 깨닫게 한다.
- ② 행동주의 이론은 실험을 통해 그 진실성이 완전히 입증되었다.
- ③ 사회과학 연구는 저널리즘과 달리 객관성을 유지해야 한다.
- ④ 아동 발달 연구는 행동주의보다 피아제의 이론에 근거해야 한다.
- ⑤ 연구자는 정치적 신념에 따라 이론을 선택하지 말아야 한다.

17. 다음 글의 내용과 일치하지 않는 것은?

- ① 필자는 사회과학 연구를 저널리즘의 사진에 비유한다.
- ② 필자는 처음에 지적, 정치적 이유로 강화 이론에 저항할 준비가 되어 있었다.
- ③ 교수는 먹이 알갱이를 이용해 비둘기의 움직임을 통제했다.
- ④ 필자는 행동주의 관점의 설득력을 지금까지도 기억한다.
- ⑤ 피아제의 실험은 인간 발달에 관한 진리를 우리에게 제공한다.

18. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

Research findings can inject life into an idea in a way that ①helps us to appreciate its significance and plausibility. In this sense, research in the social sciences can function ②like photographs in journalism. They move us to consider a point of view. My introduction to Skinnerian reinforcement theory was just of this sort. ③Although prepared to resist the theory on intellectual and political grounds, as I watched the professor ④to use food pellets to bring the random movements of a pigeon under his control, I couldn't escape the power of the behaviourist perspective. Its plausibility will always remain with me. By the same token, Piaget's famous experiments with children's problem-solving ⑤do not furnish us with the truth about human development. However,

they draw our attention to significant alternatives to behaviourism in understanding children's learning.

19. 다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은?

Research findings can inject life into an idea in a way that helps us to appreciate its significance and ① implausibility. In this sense, research in the social sciences can function like photographs in journalism. They move us to consider a point of view. My introduction to Skinnerian reinforcement theory was just of this sort. Although prepared to ② resist the theory on intellectual and political grounds, as I watched the professor use food pellets to bring the random movements of a pigeon under his control, I couldn't ③ escape the power of the behaviourist perspective. Its plausibility will always ④ remain with me. By the same token, Piaget's famous experiments with children's problem-solving do not furnish us with the truth about human development. However, they draw our attention to significant ⑤ alternatives to behaviourism in understanding children's learning.

20. 다음 글의 내용을 한 문장으로 요약하고자 한다. 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?

Like photographs in journalism, research findings do not (A) _____ the truth of an idea, but they make it (B) _____ enough to command our attention.

	(A)	(B)
①	prove	trivial
②	distort	vivid
③	prove	vivid
④	distort	obscure
⑤	ignore	trivial

21. 주어진 글 다음에 이어질 글의 순서로 가장 적절한 것을 고르시오.

Research findings can inject life into an idea in a way that helps us to appreciate its significance and plausibility. In this sense, research in the social sciences can function like photographs in journalism. They move us to consider a point of view.

(A) By the same token, Piaget's famous experiments with children's problem-solving do not furnish us with the truth about human development. However, they draw our attention to significant alternatives to behaviourism in understanding children's learning.

(B) Although prepared to resist the theory on intellectual and political grounds, as I watched the professor use food pellets to bring the random movements of a pigeon under his control, I couldn't escape the power of the behaviourist perspective. Its plausibility will always remain with me.

① (A)-(C)-(B) ② (B)-(A)-(C) ③ (B)-(C)-(A) ④ (C)-(A)-(B) ⑤ (C)-(B)-(A)

지문 4. 5강 E-2

[원문]

Although the idea that working in the cold would lead to catching a cold makes intuitive sense, scientists have only just discovered why. Until recently, the general increase in respiratory illness in the winter was blamed on the fact that people spend more time indoors together, exchanging viruses, in cooler weather. That's likely a factor, but cold is also directly, not just indirectly, responsible for making us sick, thanks to a previously unknown immune mechanism: cells in our nostrils that are capable of detecting incoming microbes and releasing a swarm of tiny little antiviral bubbles to surround and neutralize them. According to the research team behind the breakthrough, at forty degrees, nostril cells release significantly fewer and less powerful defensive bubbles than they do at seventy-five degrees, making it easier for viruses to stage a successful infection.

22. 다음 글의 주제로 가장 적절한 것은?

- ① the importance of staying indoors during winter
- ② a newly discovered immune mechanism explaining why cold weather causes colds
- ③ how viruses spread through crowded spaces
- ④ the effects of temperature on human metabolism
- ⑤ various ways to strengthen the immune system

23. 다음 글의 요지로 가장 적절한 것은?

- ① 겨울철 호흡기 질환 증가는 주로 실내 활동 증가 때문이다.
- ② 감기를 예방하려면 실내 온도를 항상 높게 유지해야 한다.
- ③ 바이러스는 온도에 관계없이 동일한 감염력을 지닌다.
- ④ 면역 체계에 대한 과학적 연구는 아직 초기 단계에 머물러 있다.
- ⑤ 추위는 콧속 세포의 항바이러스 방어 기능을 약화시켜 직접적으로 감기를 유발한다.

24. 다음 글의 내용과 일치하지 않는 것은?

- ① 추위가 감기를 유발한다는 생각은 직관적으로 타당하게 여겨져 왔다.
- ② 최근까지 겨울철 호흡기 질환 증가는 실내에서 함께 보내는 시간 때문으로 여겨졌다.
- ③ 콧속 세포는 침입하는 미생물을 감지하고 항바이러스 거품을 방출한다.
- ④ 화씨 40도에서 콧속 세포는 75도에서보다 더 많은 방어 거품을 방출한다.
- ⑤ 낮은 온도에서는 바이러스가 감염에 성공하기 더 쉽다.

25. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

Although the idea that working in the cold would lead to catching a cold ① makes intuitive sense, scientists have only just discovered why. Until recently, the general increase in respiratory illness in the winter ② blamed on the fact that people spend more time indoors together, ③ exchanging viruses, in cooler weather. That's likely a factor, but cold is also directly, not just indirectly, responsible for making us sick, thanks to a previously unknown immune mechanism: cells in our nostrils ④ that are capable of detecting incoming microbes and releasing a swarm of tiny little antiviral bubbles to surround and neutralize them. According to the research team behind the breakthrough, at forty degrees, nostril cells release significantly fewer and less powerful defensive

bubbles than they do at seventy-five degrees, ⑤ making it easier for viruses to stage a successful infection.

26. 다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은?

Although the idea that working in the cold would lead to catching a cold makes ① intuitive sense, scientists have only just discovered why. Until recently, the general increase in respiratory illness in the winter was blamed on the fact that people spend more time ② indoors together, exchanging viruses, in cooler weather. That's likely a factor, but cold is also ③ directly, not just indirectly, responsible for making us sick, thanks to a previously unknown immune mechanism: cells in our nostrils that are capable of detecting incoming microbes and releasing a swarm of tiny little antiviral bubbles to surround and ④ strengthen them. According to the research team behind the breakthrough, at forty degrees, nostril cells release significantly ⑤ fewer and less powerful defensive bubbles than they do at seventy-five degrees, making it easier for viruses to stage a successful infection.

27. 다음 글의 내용을 한 문장으로 요약하고자 한다. 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?

Cold temperatures make us more vulnerable to colds not only (A) _____, by keeping people indoors together, but also directly, by (B) _____ the antiviral defense of cells in our nostrils.

	(A)	(B)
①	indirectly	boosting
②	rarely	weakening
③	rarely	activating
④	indirectly	weakening
⑤	deliberately	boosting

28. 주어진 글 다음에 이어질 글의 순서로 가장 적절한 것을 고르시오.

[원문]

When you are about to go on stage or perhaps take the microphone in a work presentation, do you feel sweaty, get flushed, have a dry mouth, or taste metal? Before taking an exam, does your breathing quicken? These are signs of your body activating your stress response or sympathetic nervous system. But stress is bad, right? Actually, stress isn't always bad. In fact, there are two types of stress: distress (what we normally think of as "stress") and eustress (beneficial stress that motivates us). Coming from the same root as the word euphoria ("eu" meaning good), eustress has been shown to induce different physiological changes to distress, including less strain on your cardiovascular system and a burst of the love hormone oxytocin, which helps heal damage to your heart. Meditation techniques can channel distress into eustress to help you approach whatever challenge or task you face with a clear, calm mind that is ready to focus.

29. 다음 글의 주제로 가장 적절한 것은?

- ① physical symptoms of anxiety before public speaking
- ② the harmful effects of stress on the heart
- ③ the origin of the word euphoria
- ④ why meditation is difficult for beginners
- ⑤ the beneficial side of stress and how to make use of it

30. 다음 글의 요지로 가장 적절한 것은?

- ① 스트레스 반응은 신체에 해로우므로 반드시 억제해야 한다.
- ② 발표 전 긴장을 없애려면 충분한 연습이 필요하다.
- ③ 스트레스에는 유익한 종류도 있으며, 이를 활용하면 도전에 더 잘 대처할 수 있다.
- ④ 옥시토신은 심장 질환 치료에 널리 사용되는 호르몬이다.
- ⑤ 명상은 스트레스를 완전히 제거하는 가장 효과적인 방법이다.

31. 다음 글의 내용과 일치하지 않는 것은?

- ① 유스트레스는 디스트레스보다 심혈관계에 더 큰 부담을 준다.
- ② 무대에 오르기 전 입이 마르거나 금속 맛이 나는 것은 스트레스 반응의 신호이다.
- ③ 스트레스에는 디스트레스와 유스트레스 두 가지 유형이 있다.
- ④ 유스트레스는 '좋다'는 뜻의 'eu'에서 유래하여 euphoria와 어원이 같다.
- ⑤ 명상 기법은 디스트레스를 유스트레스로 전환하는 데 도움이 될 수 있다.

32. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

When you are about to go on stage or perhaps take the microphone in a work presentation, do you feel sweaty, get flushed, have a dry mouth, or taste metal? 지문 6. 8강 E-2

[원문]

Our tendency to intentionally avoid unpleasant information, even information that would help us monitor our goal progress, is called the "ostrich effect." The name comes from the false belief that ostriches bury their heads in the sand to avoid danger. Although it's untrue for the giant birds, we do tend to stick our heads in the sand to hide from a coming threat—our threat being emotional. So, for example, some diabetics avoid monitoring their blood sugar, and many people strategically fail to monitor their household energy consumption or check their bank balances. Further, one study documented that investors avoid checking their accounts after market declines. We do this because we realize that what we don't know can't hurt our mood, so we avoid the information even though not knowing can hurt our health or wealth.

36. 다음 글의 주제로 가장 적절한 것은?

- ① our tendency to avoid unpleasant information to protect our mood
- ② the behavior of ostriches in the face of danger
- ③ how to monitor blood sugar effectively
- ④ the psychological effects of stock market declines
- ⑤ the importance of checking bank balances regularly

37. 다음 글의 요지로 가장 적절한 것은?

- ① 타조는 위험을 피하기 위해 실제로 머리를 모래에 묻는다.
- ② 투자자는 시장이 하락할 때 계좌를 더 자주 확인해야 한다.
- ③ 목표 달성을 위해서는 감정보다 이성을 우선해야 한다.
- ④ 사람들은 기분을 지키기 위해 불쾌한 정보를 피하지만, 그 결과 건강이나 재산에 손해를 입을 수 있다.
- ⑤ 정보의 양이 많을수록 사람들은 더 나은 결정을 내린다.

38. 다음 글의 내용과 일치하지 않는 것은?

- ① '타조 효과'는 불쾌한 정보를 의도적으로 피하는 경향을 가리킨다.
- ② 타조가 위험을 피하려고 머리를 모래에 묻는다는 것은 사실이 아니다.
- ③ 일부 당뇨병 환자는 혈당 측정을 피한다.
- ④ 한 연구에 따르면 투자자들은 시장이 하락한 후 계좌 확인을 피한다.
- ⑤ 사람들은 모르는 것이 건강이나 재산에 해가 될 수 없다고 믿기 때문에 정보를 피한다.

39. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

Our tendency to intentionally avoid unpleasant information, even information that would help us monitor our goal progress, ① is called the "ostrich effect." The name comes from the false belief ② that ostriches bury their heads in the sand to avoid danger. Although it's untrue for the giant birds, we do tend to stick our heads in the sand to hide from a coming threat—our threat ③ being emotional. So, for example, some diabetics ④ avoid to monitor their blood sugar, and many people strategically fail to monitor their household energy consumption or check their bank balances. Further, one study documented that investors avoid checking their accounts after market declines. We do this because we realize that ⑤ what we don't know can't hurt our mood, so we avoid the information even though not knowing can hurt our health or wealth.

40. 다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은?

Our tendency to intentionally ①avoid unpleasant information, even information that would help us monitor our goal progress, is called the "ostrich effect." The name comes from the ②false belief that ostriches bury their heads in the sand to avoid danger. Although it's untrue for the giant birds, we do tend to stick our heads in the sand to ③confront a coming threat—our threat being emotional. So, for example, some diabetics avoid monitoring their blood sugar, and many people ④strategically fail to monitor their household energy consumption or check their bank balances. Further, one study documented that investors avoid checking their accounts after market ⑤declines. We do this because we realize that what we don't know can't hurt our mood, so we avoid the information even though not knowing can hurt our health or wealth.

41. 다음 글의 내용을 한 문장으로 요약하고자 한다. 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?

People often (A) _____ information that could harm their mood, even when ignoring it may (B) _____ their health or finances.

	(A)	(B)
①	seek	damage
②	shun	damage
③	shun	protect
④	seek	improve
⑤	share	protect

42. 주어진 글 다음에 이어질 글의 순서로 가장 적절한 것을 고르시오.

Our tendency to intentionally avoid unpleasant information, even information that would help us monitor our goal progress, is called the "ostrich effect."

(A) We do this because we realize that what we don't know can't hurt our mood, so we avoid the information even though not knowing can hurt our health or wealth.

(B) The name comes from the false belief that ostriches bury their heads in the sand to avoid danger. Although it's untrue for the giant birds, we do tend to stick our heads in the sand to hide from a coming threat—our threat being emotional.

(C) So, for example, some diabetics avoid monitoring their blood sugar, and many people strategically fail to monitor their household energy consumption or check their bank balances. Further, one study documented that investors avoid checking their accounts after market declines.

[원문]

Visual arts students are trained to look, a task far more complex than a layperson might think. Seeing is framed by expectation, and expectation often gets in the way of perceiving the world accurately. For example, when asked to draw a human face, most people will set the eyes near the top of the head. But this perception does not correspond to how a face is really proportioned, as students learn: our eyes divide the head nearly at the center line. If asked to draw a whole person, people tend to draw the hands much smaller than the face—again, an inaccurate perception. The power of our expectations explains why beginners draw eyes too high and hands too small. Observational drawing requires that one break away from stereotypes and see accurately and directly.

43. 다음 글의 주제로 가장 적절한 것은?

- ① the history of portrait painting
- ② techniques for drawing realistic hands
- ③ how expectations distort accurate perception in drawing
- ④ why art students should study anatomy
- ⑤ differences between professional and amateur artists' tools

44. 다음 글의 요지로 가장 적절한 것은?

- ① 얼굴을 그릴 때는 눈을 머리 윗부분에 배치해야 한다.
- ② 정확하게 보기 위해서는 기대에서 비롯된 고정관념에서 벗어나야 한다.
- ③ 미술 교육은 기술보다 창의성을 강조해야 한다.
- ④ 초보자는 손보다 얼굴을 먼저 그리는 연습을 해야 한다.
- ⑤ 관찰력은 타고나는 것이므로 훈련으로 기르기 어렵다.

45. 다음 글의 내용과 일치하지 않는 것은?

- ① 시각 예술 전공 학생들은 보는 훈련을 받는다.
- ② 사람들은 전신을 그릴 때 손을 얼굴보다 훨씬 크게 그리는 경향이 있다.
- ③ 기대는 세상을 정확하게 지각하는 데 방해가 되곤 한다.
- ④ 대부분의 사람은 얼굴을 그릴 때 눈을 머리 위쪽 가까이에 그린다.
- ⑤ 실제로 눈은 머리의 거의 중앙선에 위치한다.

46. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

[원문]

We all like to think of ourselves as rational actors, careful and considered in our thinking, capable of sound and reliable judgments. We might believe that we generally consider different points of view and make informed decisions. We are, in fact, "predictably irrational," as psychologist Dan Ariely titled his book on the topic. All of us engage in automatic, reflexive thinking, typically taking the easier path and conserving mental effort. Although we each may have the subjective impression that we are careful thinkers, we often make snap judgments or no real judgments at all. In addition, numerous biases inhibit or override reflective, deliberative thought; intuitive theories can also interfere with acceptance of accurate scientific explanations. Understanding more about how our minds work and how biases may operate can make us each less subject to fallacious reasoning, more rational, and more aware of the problems in others' thinking. Learning to understand the built-in limitations of our mental processes can also help us improve our ability to inform others more effectively.

50. 다음 글의 주제로 가장 적절한 것은?

- ① the superiority of intuition over scientific reasoning
- ② the benefits of understanding our irrational thinking tendencies
- ③ how to write a best-selling book on psychology
- ④ the difference between rational and emotional people
- ⑤ ways to persuade others using logical arguments

51. 다음 글의 요지로 가장 적절한 것은?

- ① 직관적 사고는 과학적 설명보다 실생활에서 더 유용하다.
- ② 다른 사람의 사고 문제를 지적하기 전에 자신을 먼저 돌아봐야 한다.
- ③ 정신적 노력을 아끼는 것은 효율적인 의사 결정의 핵심이다.
- ④ 편향은 타고나는 것이므로 교육으로 극복하기 어렵다.
- ⑤ 우리는 스스로 생각하는 것만큼 합리적이지 않으며, 사고의 한계를 이해하면 더 합리적으로 될 수 있다.

52. 다음 글의 내용과 일치하지 않는 것은?

- ① 사람들은 자신을 신중하고 합리적인 행위자로 여기기를 좋아한다.
- ② Dan Ariely는 '예측 가능하게 비합리적'이라는 제목의 책을 썼다.
- ③ 우리는 흔히 정신적 노력을 아끼려고 더 쉬운 사고 경로를 택한다.
- ④ 직관적 이론은 정확한 과학적 설명을 받아들이는 데 도움이 된다.
- ⑤ 편향의 작동 방식을 이해하면 잘못된 추론에 덜 빠지게 된다.

53. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

[원문]

It was thought at first that AI would end discrimination and bias, by taking human bigotry out of the loop. Unfortunately, some famous studies have indicated that bias can still occur. For example, AI was shown to do a better job of recognizing white people, as compared to dark-skinned people. The bad performance was blamed on biased training data for the machine learning algorithm. Today, the conventional wisdom holds that biased training data are what cause AI bias, implying that unbiased training data will solve the problem. This is false. Although biased training data can, in fact, be a source of algorithmic bias, such bias can emerge even from unbiased data. For example, Lambrecht and Tucker showed that a gender-neutral ad could nevertheless discriminate against women, for the ironic reason that targeting women is sometimes more expensive, leading to fewer ads that target women.

57. 다음 글의 주제로 가장 적절한 것은?

- ① the history of facial recognition technology
- ② how advertisers decide whom to target online
- ③ the advantages of AI over human decision makers
- ④ ways to collect more diverse training data
- ⑤ why unbiased training data alone cannot eliminate AI bias

58. 다음 글의 요지로 가장 적절한 것은?

- ① AI의 편향은 편향된 학습 데이터뿐 아니라 편향되지 않은 데이터에서도 발생할 수 있다.
- ② AI는 인간의 편견을 제거하여 차별을 종식시킬 것이다.
- ③ 학습 데이터의 편향을 없애면 AI의 편향 문제는 해결된다.
- ④ 광고 비용은 성별에 관계없이 동일하게 책정되어야 한다.
- ⑤ 얼굴 인식 기술은 아직 실용화하기에 부족하다.

59. 다음 글의 내용과 일치하지 않는 것은?

- ① 처음에는 AI가 차별과 편향을 종식시킬 것으로 여겨졌다.
- ② AI는 피부색이 어두운 사람보다 백인을 더 잘 인식하는 것으로 나타났다.
- ③ Lambrecht와 Tucker는 여성을 겨냥한 광고가 남성을 겨냥한 광고보다 비용이 적게 든다는 것을 보여 주었다.
- ④ AI의 낮은 성능은 편향된 학습 데이터 탓으로 여겨졌다.
- ⑤ 통념에 따르면 편향되지 않은 학습 데이터가 AI 편향 문제를 해결할 것이다.

60. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

It was thought at first ① what AI would end discrimination and bias, by taking human bigotry out of the loop. Unfortunately, some famous studies have indicated that bias can still occur. For example, AI was shown ② to do a better job of recognizing white people, as compared to dark-skinned people. The bad performance was blamed on biased training data for the machine learning algorithm. Today, the conventional wisdom holds that biased training data are ③ what cause AI bias, implying that unbiased training data will solve the problem. This is false. Although biased training data can, in fact, be a source of algorithmic bias, such bias can ④ emerge even from unbiased data. For example, Lambrecht and Tucker showed that a gender-neutral ad could

nevertheless discriminate against women, for the ironic reason that targeting women is sometimes more expensive, ⑤leading to fewer ads that target women.

61. 다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은?

[원문]

'Free play' teaches an awareness of space and the confidence to move about in it, important skills that are fundamental to navigation and wayfinding. Research shows that children who are allowed to roam free have a better sense of their surroundings, and a better sense of direction. This may explain why people who grow up in rural areas tend to be better navigators than those who grow up in cities. One study found that nine-year-olds who regularly cycle around their home towns are able to sketch them in greater detail than those who don't. This suggests an advanced level of spatial cognition for their age. Others have shown that eleven-year-olds who make their own way to school can draw more accurate maps of their local area than their peers who are accompanied by an adult or travel by car. This is the difference between active and passive learning: children who are driven everywhere never get the opportunity to make their own decisions or draw their own maps. They cease being explorers.

64. 다음 글의 주제로 가장 적절한 것은?

- ① safety concerns about children cycling alone
- ② differences in school systems between rural and urban areas
- ③ the benefits of driving children to school
- ④ the role of free, independent exploration in developing children's spatial skills
- ⑤ how to teach map-reading in the classroom

65. 다음 글의 요지로 가장 적절한 것은?

- ① 도시 아이들은 시골 아이들보다 지도를 더 정확하게 그린다.
- ② 부모는 안전을 위해 아이들의 등하굣길에 동행해야 한다.
- ③ 아이들이 스스로 돌아다니며 탐색할 때 공간 인지 능력과 방향 감각이 발달한다.
- ④ 자전거 타기는 아이들의 신체 건강에 가장 좋은 운동이다.
- ⑤ 지도 그리기는 학교 교육과정에 반드시 포함되어야 한다.

66. 다음 글의 내용과 일치하지 않는 것은?

- ① 자유롭게 돌아다니도록 허용된 아이들은 방향 감각이 더 좋다.
- ② 시골에서 자란 사람들이 도시에서 자란 사람들보다 길을 더 잘 찾는 경향이 있다.
- ③ 자전거로 동네를 자주 돌아다니는 아홉 살 아이들은 동네를 더 자세히 그릴 수 있다.
- ④ 어른과 함께 등교하는 열한 살 아이들이 혼자 등교하는 아이들보다 더 정확한 지도를 그린다.
- ⑤ 어디든 차로 이동하는 아이들은 스스로 결정할 기회를 얻지 못한다.

67. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

[원문]

The more you churn over painful thoughts or memories, the easier it becomes for you to bring those things to mind. You find yourself in a trap in which you continuously re-trigger painful emotions and distress and sink into a dark place. So, what can we do to stop the rumination that feeds painful emotion? When trying to change something in the moment, purely using a mental concept in our heads to re-focus on something new can be hugely difficult. I have seen many people use an active approach to good effect. When you notice that you are sliding down the slippery slope of rumination, try a firm hand pushed out in front and one word, 'Stop!', quickly followed by physical movement, such as standing up and moving away from the position you are in. Change activity for a moment, or even just walk around or step outside for a few minutes, whatever is possible at the time. Physically moving your body can help to shift your mind when it is otherwise very difficult.

71. 다음 글의 주제로 가장 적절한 것은?

- ① using physical action to break the cycle of rumination
- ② the causes of painful childhood memories
- ③ the benefits of regular outdoor exercise
- ④ why mental concentration improves with practice
- ⑤ how to remember important things more easily

72. 다음 글의 요지로 가장 적절한 것은?

- ① 고통스러운 기억은 반복해서 떠올릴수록 빨리 잊힌다.
- ② 감정 조절을 위해서는 전문가의 상담이 반드시 필요하다.
- ③ 명상을 통해 마음을 새로운 대상에 집중시킬 수 있다.
- ④ 반추에서 벗어나기 위해서는 생각만으로 애쓰기보다 몸을 움직이는 적극적 행동이 효과적이다.
- ⑤ 부정적 감정은 억누르지 말고 충분히 표현해야 한다.

73. 다음 글의 내용과 일치하지 않는 것은?

- ① 고통스러운 생각을 곱씹을수록 그것을 떠올리기가 더 쉬워진다.
- ② 반추는 고통스러운 감정을 계속 다시 촉발하는 뜻이 될 수 있다.
- ③ 머릿속 개념만으로 새로운 것에 다시 집중하는 것은 매우 어려울 수 있다.
- ④ 필자는 '멈춰!'라는 말과 함께 손을 앞으로 내미는 방법을 제안한다.
- ⑤ 필자는 신체 움직임보다 정신적 집중이 마음을 전환하는 데 더 효과적이라고 본다.

74. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

[원문]

Mirror neuron systems help explain a wide range of phenomena, including the human tendency to respond emotionally to other people's expressions of emotions. For example, it is often the case that 'anger is contagious', or that a person's smile can 'light up a room', or that audiences at large pop concerts 'move as one to the music'. Mirror neurons are cells within certain high-level body maps that represent actions performed both by oneself and others. We simulate others' movements and emotional expressions 'automatically, without logic, thinking, analyzing'. Mirror neurons might also explain anthropologist Ruth Finnegan's observation that 'we learn how to feel, and how to deploy particular emotions in ways and contexts appropriate to your situation'. The same holds for musical expressions and experience of happiness, anger and distress.

78. 다음 글의 주제로 가장 적절한 것은?

- ① the role of music in reducing anger
- ② the anatomy of the human brain
- ③ how mirror neurons explain our automatic emotional responses to others
- ④ why pop concerts attract large audiences
- ⑤ cultural differences in expressing emotions

79. 다음 글의 요지로 가장 적절한 것은?

- ① 감정 표현은 논리적 사고를 거쳐 의식적으로 이루어진다.
- ② 거울 신경 세포는 우리가 타인의 감정과 행동을 자동적으로 모방하고 감정을 학습하는 방식을 설명해 준다.
- ③ 음악은 인간의 감정을 통제하는 가장 강력한 수단이다.
- ④ 분노와 같은 부정적 감정은 타인에게 전염되지 않도록 억제해야 한다.
- ⑤ 인류학 연구는 뇌과학의 발견을 검증하는 데 한계가 있다.

80. 다음 글의 내용과 일치하지 않는 것은?

- ① 우리는 타인의 움직임과 감정 표현을 논리적 분석을 거쳐 모방한다.
- ② 거울 신경 세포 체계는 타인의 감정 표현에 감정적으로 반응하는 경향을 설명하는 데 도움을 준다.
- ③ 한 사람의 미소가 방 전체를 환하게 만드는 것은 감정 전염의 예이다.
- ④ 거울 신경 세포는 자신과 타인이 수행하는 행동을 표상하는 세포이다.
- ⑤ Ruth Finnegan은 우리가 상황에 맞게 감정을 활용하는 법을 배운다고 보았다.

81. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

Mirror neuron systems ① help explaining a wide range of phenomena, including the human tendency to respond emotionally to other people's expressions of emotions. For example, it is often the case ② that 'anger is contagious', or that a person's smile can 'light up a room', or that audiences at large pop concerts 'move as one to the music'. Mirror neurons are cells within certain high-level body maps that represent actions ③ performed both by oneself and others. We simulate ④ others' movements and emotional expressions 'automatically, without logic, thinking, analyzing'. Mirror neurons might also explain anthropologist Ruth Finnegan's observation that 'we learn how to feel, and how to deploy particular emotions in ways and contexts appropriate to your situation'. The same ⑤ holds for musical expressions and experience of happiness, anger and distress.

[원문]

When we switch from empathy to compassion, we change our very brain chemistry. Indeed, leading compassion researcher Tania Singer found that different parts of the brain are activated when we share someone's pain (empathy) versus when we want to respond warmly to someone's suffering (compassion). Our heart rate slows, we release the "bonding hormone" oxytocin, and the parts of the brain linked to caregiving and pleasure light up. Once compassion enters the picture, we do not necessarily experience other people's pain with them, explains Singer, but we feel concern for them and a strong desire to help. Rather than turning us away from others, our compassion connects us even more deeply to them and strengthens our social ties. To be clear, empathy is, in itself, a wonderful thing. It's a superpower all sensitive people share. But empathy alone can become overwhelming. That's where compassion comes in. It's what allows us to use our empathy to make a difference.

85. 다음 글의 주제로 가장 적절한 것은?

- ① the dangers of caring too much about others
- ② how compassion differs from empathy and complements it
- ③ the role of hormones in physical health
- ④ why sensitive people avoid social relationships
- ⑤ scientific methods for measuring brain activity

86. 다음 글의 요지로 가장 적절한 것은?

- ① 타인의 고통을 함께 느끼는 것은 뇌에 해로우므로 피해야 한다.
- ② 연민은 공감과 달리 사회적 유대를 약화시킨다.
- ③ 민감한 사람들은 감정을 억제하는 훈련이 필요하다.
- ④ 옥시토신 분비를 늘리는 것이 스트레스 해소의 핵심이다.
- ⑤ 공감은 소중하지만 압도적일 수 있으므로, 연민으로 전환하여 타인을 실제로 돕는 힘으로 바꾸어야 한다.

87. 다음 글의 내용과 일치하지 않는 것은?

- ① 공감에서 연민으로 전환하면 뇌의 화학 작용이 변한다.
- ② Tania Singer는 공감과 연민이 뇌의 서로 다른 부위를 활성화한다는 것을 발견했다.
- ③ 연민을 느낄 때 심박수가 빨라지고 옥시토신이 분비된다.
- ④ 연민은 우리를 타인과 더 깊이 연결하고 사회적 유대를 강화한다.
- ⑤ 필자는 공감 자체를 훌륭한 것으로 본다.

88. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

[원문]

The writer and zoologist Desmond Morris observed that our feet communicate exactly what we think and feel more honestly than any other part of our bodies. Why are the feet and legs such accurate reflectors of our sentiments? For millions of years, long before humans spoke, our legs and feet reacted to environmental threats (e.g., hot sand, ill-tempered lions) instantaneously, without the need for conscious thought. Our limbic brains made sure that our feet and legs reacted as needed by either ceasing motion, running away, or kicking at a potential threat. This survival regimen, retained from our ancestral heritage, has served us well and continues to do so today. In fact, these age-old reactions are still so hardwired in us that when we are presented with something dangerous or even disagreeable, our feet and legs still react as they did in prehistoric times.

92. 다음 글의 주제로 가장 적절한 것은?

- ① the evolution of human language
- ② how to protect your feet from injury
- ③ the role of the limbic brain in memory
- ④ why our feet and legs honestly reveal our feelings
- ⑤ differences between human and animal movement

93. 다음 글의 요지로 가장 적절한 것은?

- ① 발과 다리는 오랜 진화 과정에서 형성된 본능적 반응 덕분에 우리의 감정을 가장 정직하게 드러낸다.
- ② 인간은 언어를 통해 감정을 가장 정확하게 표현한다.
- ③ 위험에 직면했을 때는 의식적으로 판단한 뒤 행동해야 한다.
- ④ 현대인은 원시 시대의 생존 본능을 대부분 잃어버렸다.
- ⑤ 동물학자의 관찰은 인간 행동 연구에 적용하기 어렵다.

94. 다음 글의 내용과 일치하지 않는 것은?

- ① Desmond Morris는 작가이자 동물학자이다.
- ② 인간이 말을 하기 훨씬 전부터 다리와 발은 환경적 위협에 즉각 반응했다.
- ③ 변연계 뇌는 발과 다리가 필요에 따라 반응하도록 했다.
- ④ 이 생존 체계는 현대에 이르러 더 이상 우리에게 도움이 되지 않는다.
- ⑤ 우리는 불쾌한 것을 마주할 때도 선사 시대와 같은 방식으로 발과 다리가 반응한다.

95. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

The writer and zoologist Desmond Morris observed that our feet communicate exactly what we think and feel ① more honestly than any other part of our bodies. [원문]

Identity development occurs within the context of the adolescent's larger sociohistorical context, which is replete with factors that can facilitate or impede identity development. Certain conditions usually associated with high-status individuals in industrialized nations foster identity exploration. However, there are also potential barriers, or external limitations, that constrain identity exploration and commitment. These barriers may result from factors such as geographic isolation, socioeconomic status, lack of educational opportunities, overbearing parents, and political zeitgeist. For instance, some parents may prohibit their adolescent daughters from working and expect them to commit to arranged marriages according to cultural beliefs.

99. 다음 글의 주제로 가장 적절한 것은?

- ① the psychological effects of arranged marriages
- ② the advantages of growing up in industrialized nations
- ③ how parents can improve their teenagers' academic performance
- ④ the stages of identity formation in early childhood
- ⑤ social and historical factors that help or hinder adolescent identity development

100. 다음 글의 요지로 가장 적절한 것은?

- ① 부모는 자녀의 직업 선택에 개입하지 말아야 한다.
- ② 산업화된 국가의 청소년은 정체성 혼란을 겪지 않는다.
- ③ 청소년의 정체성 발달은 사회역사적 환경의 촉진 요인과 제약 요인의 영향을 받는다.
- ④ 정체성은 외부 환경과 무관하게 개인 내부에서 형성된다.
- ⑤ 문화적 전통은 청소년의 성장에 긍정적인 영향을 미친다.

101. 다음 글의 내용과 일치하지 않는 것은?

- ① 정체성 발달은 청소년을 둘러싼 더 큰 사회역사적 맥락 속에서 일어난다.
- ② 일부 부모는 딸에게 직업을 갖도록 요구하고 중매결혼을 금지한다.
- ③ 산업화된 국가의 높은 지위와 관련된 조건은 정체성 탐색을 촉진한다.
- ④ 정체성 탐색을 제약하는 외부적 장벽도 존재한다.
- ⑤ 지리적 고립과 교육 기회 부족은 정체성 탐색의 장벽이 될 수 있다.

102. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

Identity development occurs within the context of the adolescent's larger sociohistorical context, ① which is replete with factors that can facilitate or impede identity development. [원문]

Given the nature of emotional contagion, film is especially well suited to produce it. Carl Plantinga explains this in his discussion of the "scene of empathy," which refers to a scene in which the narrative slows down and a character's emotional experience becomes the focus of attention. Such scenes, which are typically shot in close-up and focus on a character's face, contain several eliciting conditions of emotional contagion. Most important is attention, since contagion responses require that a spectator's attention be fixed on a character's facial expressions. Filmmakers achieve this through the use of extreme close-ups, shallow focus, and various point-of-view structures and by using progressively closer shots of a character's face and expressions.

106. 다음 글의 주제로 가장 적절한 것은?

- ① the history of close-up shots in cinema
- ② how film techniques produce emotional contagion in viewers
- ③ why audiences prefer fast-paced narratives
- ④ the difficulties of acting with facial expressions
- ⑤ the influence of film critics on public taste

107. 다음 글의 요지로 가장 적절한 것은?

- ① 영화의 서사는 빠르게 전개될수록 관객의 몰입을 높인다.
- ② 배우의 연기력이 영화의 감정적 효과를 결정하는 유일한 요소이다.
- ③ 감정 전염은 영화보다 실제 대면 상황에서 더 잘 일어난다.
- ④ 영화는 인물의 얼굴에 관객의 주의를 집중시키는 기법을 통해 감정 전염을 효과적으로 일으킨다.
- ⑤ 관객은 시점 구조보다 대사를 통해 인물의 감정을 이해한다.

108. 다음 글의 내용과 일치하지 않는 것은?

- ① 영화는 감정 전염을 일으키기에 특히 적합하다.
- ② '공감 장면'에서는 서사가 느려지고 인물의 감정 경험이 주목의 초점이 된다.
- ③ 공감 장면은 주로 클로즈업으로 촬영되며 인물의 얼굴에 초점을 맞춘다.
- ④ 감정 전염이 일어나려면 관객의 주위가 인물의 표정에 고정되어야 한다.
- ⑤ 영화 제작자는 인물의 얼굴에서 점차 멀어지는 촬영으로 관객의 주의를 끈다.

109. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

Given the nature of emotional contagion, film is especially well ① suited to produce it. Carl Plantinga explains this in his discussion of the "scene of empathy," which ② refers to a scene in which the narrative slows down and a character's emotional experience becomes the focus of attention. Such scenes, which ③ are typically shot in close-up and focus on a character's face, contain several eliciting conditions of emotional contagion. ④ Most important is attention, since contagion responses require that a spectator's attention be fixed on a character's facial expressions. [원문]

If we take an evolutionary look at our beginnings, we see a life in which high levels of physical activity were required for survival. Even one century ago, most people needed to be physically active to work, to travel, and to take care of homes and families. Our modern world has engineered such activity out of our lives. There are fewer manual jobs, we do not need to travel on foot, we do not need to hunt and harvest for our food, and many domestic chores have been mechanized. While these changes have created many benefits for our longevity and quality of life, they have also created many problems. Lack of sufficient physical activity has now been linked to at least 17 unhealthy conditions, almost all of which are chronic diseases or considered risk factors for chronic diseases. Adrienne Hardman has summarized this serious situation for public health: "Physical inactivity is a waste of human potential for health and well-being."

113. 다음 글의 주제로 가장 적절한 것은?

- ① health problems caused by the decline of physical activity in modern life
- ② the benefits of technology for household work
- ③ how our ancestors hunted and gathered food
- ④ the importance of a balanced diet for longevity
- ⑤ reasons for the increase in manual jobs

114. 다음 글의 요지로 가장 적절한 것은?

- ① 기술 발전은 인간의 수명과 삶의 질을 획기적으로 향상시켰다.
- ② 현대 사회는 신체 활동의 필요성을 없앴고, 이로 인한 운동 부족은 심각한 건강 문제를 초래한다.
- ③ 만성 질환 예방을 위해서는 정기적인 건강 검진이 필수적이다.
- ④ 육체노동 중심의 직업은 정신 건강에 부정적인 영향을 미친다.
- ⑤ 인류는 진화적으로 앉아서 생활하는 데 적합하게 변해 왔다.

115. 다음 글의 내용과 일치하지 않는 것은?

- ① 이러한 변화는 수명과 삶의 질에 아무런 이점을 가져다주지 않았다.
- ② 진화적 관점에서 볼 때 초기 인류의 생존에는 높은 수준의 신체 활동이 필요했다.
- ③ 한 세기 전만 해도 대부분의 사람은 일과 이동을 위해 신체적으로 활동해야 했다.
- ④ 현대 사회에서는 육체노동 직업이 줄고 많은 집안일이 기계화되었다.
- ⑤ 신체 활동 부족은 최소 17가지 건강하지 않은 상태와 연관되어 있다.

116. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

If we take an evolutionary look at our beginnings, we see a life ① which high levels of physical activity were required for survival. If we take an evolutionary look at our beginnings, we see a life in which high levels of physical activity were required for survival. Even one century ago, most people needed to be physically active to work, to travel, and to take care of homes and families.

(A) While these changes have created many benefits for our longevity and quality of life, they have also created many problems.

(B) Our modern world has engineered such activity out of our lives. There are fewer manual jobs, we do not need to travel on foot, we do not need to hunt and harvest for our food, and many domestic chores have been mechanized.

(C) Lack of sufficient physical activity has now been linked to at least 17 unhealthy conditions, almost all of which are chronic diseases or considered risk factors for chronic diseases. Adrienne Hardman has summarized this serious situation for public health: "Physical inactivity is a waste of human potential for health and well-being."

Adaptation includes two processes: assimilation and accommodation. Assimilation refers to the process of including new information into existing schemas or what we already know. For example, when a child walks into a mall and observes a mannequin draped in women's clothes, the child is likely to address it by referring to it as an older woman. The child may wonder how or why the woman is standing completely still or how the skin tone is different. This additional information will either be discarded or included in the existing schema of an older woman's appearance. In accommodation, existing schemas are changed in response to new situations and experiences. For example, a child has a schema of a dog. But when he sees a cow, he will need to modify the schema, as the new schema of size variation in the body, such as the tail or the presence of horns, will not fit into the existing schema of a dog.

120. 다음 글의 주제로 가장 적절한 것은?

- ① the difficulty of distinguishing animals for young children
- ② why mannequins confuse shoppers in malls
- ③ two processes by which children adapt their existing knowledge to new information
- ④ the role of parents in children's language development
- ⑤ how memory declines with age

121. 다음 글의 요지로 가장 적절한 것은?

- ① 아이는 새로운 정보를 접하면 항상 기존 도식을 버린다.
- ② 동화는 조절보다 인지 발달에 더 중요한 과정이다.
- ③ 아이의 관찰력은 쇼핑몰과 같은 실제 환경에서 가장 잘 발달한다.
- ④ 동물에 대한 도식은 직접 경험 없이도 형성될 수 있다.
- ⑤ 아이는 새로운 정보를 기존 도식에 통합하거나 기존 도식을 수정하는 방식으로 세상에 적응한다.

122. 다음 글의 내용과 일치하지 않는 것은?

- ① 적응은 동화와 조절이라는 두 과정을 포함한다.
- ② 동화는 새로운 정보를 기존 도식에 포함시키는 과정이다.
- ③ 아이는 소를 보았을 때 개의 도식을 수정하지 않고 그대로 유지한다.
- ④ 아이는 마네킹을 나이 든 여성으로 지칭할 가능성이 있다.
- ⑤ 조절에서는 새로운 상황에 맞추어 기존 도식이 변화한다.

123. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

Adaptation includes two processes: assimilation and accommodation. Assimilation ①refers to the process of including new information into existing schemas or what we already know. For example, when a child walks into a mall and observes a mannequin ②draping in women's clothes, the child ③is likely to address it by referring to it as an older woman. The child may wonder how or why the woman is standing completely still or how the skin tone is different. This additional information will ④either be discarded or included in the existing schema of an older woman's appearance. In accommodation, existing schemas ⑤are changed in response to new situations and experiences. For example, a child has a schema of a dog. But when he sees a cow, he will need to modify the

schema, as the new schema of size variation in the body, such as the tail or the presence of horns, will not fit into the existing schema of a dog.

[원문]

People involved in the conception and engineering of robots designed to perceive and act know how fundamental is the ability to discriminate oneself from other entities in the environment. Without such an ability, no goal-oriented action would be possible. Imagine that you have to build a robot able to search for blocks scattered in a room in order to pile them. Even this simple task would require that your machine be able to discriminate between stimulation that originates from its own machinery and stimulation that originates from the blocks in the environment. Suppose that you equip your robot with an artificial eye and an artificial arm to detect, grab, and pile the blocks. To be successful, your machine will have to have some built-in system enabling it to discriminate between the detection of a block and the detection of its own arm. If not, the robot might endlessly chase itself rather than the blocks. Your robot would engage in circular, self-centered acts that would drive it away from the target or external goal.

127. 다음 글의 주제로 가장 적절한 것은?

- ① the cost of building industrial robots
- ② how robots learn to recognize human faces
- ③ the dangers of artificial intelligence surpassing humans
- ④ the design of artificial eyes and arms
- ⑤ the necessity of self-other discrimination for goal-directed action

128. 다음 글의 요지로 가장 적절한 것은?

- ① 자신과 외부 대상을 구별하는 능력은 목표 지향적 행동의 필수 조건이다.
- ② 로봇은 인간보다 물체를 더 정확하게 인식할 수 있다.
- ③ 로봇 공학의 발전은 단순 작업의 자동화에서 시작되어야 한다.
- ④ 인공 눈과 인공 팔의 성능이 로봇 성공의 핵심이다.
- ⑤ 로봇은 외부 목표보다 자기 보호를 우선하도록 설계되어야 한다.

129. 다음 글의 내용과 일치하지 않는 것은?

- ① 로봇 설계자들은 자신을 다른 개체와 구별하는 능력이 얼마나 근본적인지 알고 있다.
- ② 자기 구별 능력이 없는 로봇은 블록을 더 빠르게 찾아 쌓게 된다.
- ③ 자신과 타자를 구별하는 능력이 없으면 목표 지향적 행동은 불가능하다.
- ④ 블록을 쌓는 단순한 과제도 자극의 출처를 구별하는 능력을 요구한다.
- ⑤ 로봇에는 블록 감지와 자기 팔 감지를 구별하는 내장 체계가 필요하다.

[원문]

When people deviate from what is expected of them, other people react. But on what do their reactions depend? Do they depend simply on the nature of the deviance itself, or is more involved? If so, what sorts of things might be involved in their reactions? It is these fascinating questions that William Chambliss examines in his study of two groups of delinquents in the same high school. He found that although both groups were involved in serious and repetitive delinquent acts, one was perceived as a group of saints, while the other was viewed as a bunch of roughnecks. After analyzing what influenced people's perceptions, and hence their reactions to the boys, Chambliss examines the far-reaching effects of those reactions. He indicates that in the case of the roughnecks, people's reactions helped lock the boys into behaviors that continued after high school, eventually leading to prison or to low-paying jobs. In contrast, social reactions to the saints helped to set them on a life course that meant not only staying out of prison but also entering well-paying positions of prestige.

134. 다음 글의 주제로 가장 적절한 것은?

- ① the causes of juvenile crime in high schools
- ② the effectiveness of prison in reducing crime
- ③ why wealthy students perform better academically
- ④ how social reactions to deviance shape the future of young people
- ⑤ methods of conducting sociological interviews

135. 다음 글의 요지로 가장 적절한 것은?

- ① 청소년 비행은 가정 환경보다 학교 환경의 영향을 더 많이 받는다.
- ② 반복적인 비행을 저지른 학생은 반드시 처벌해야 한다.
- ③ 일탈 행위 자체보다 그에 대한 사회적 반응이 청소년의 이후 삶의 경로를 크게 좌우한다.
- ④ 사회적 지위가 높은 사람은 일탈 행위를 덜 저지른다.
- ⑤ 사회학 연구는 개인의 성공 요인을 밝히는 데 한계가 있다.

136. 다음 글의 내용과 일치하지 않는 것은?

- ① Chambliss는 같은 고등학교의 두 비행 집단을 연구했다.
- ② 두 집단 모두 심각하고 반복적인 비행 행위에 연루되어 있었다.
- ③ 한 집단은 '성자'로, 다른 집단은 '거친 아이들'로 인식되었다.
- ④ '거친 아이들'에 대한 사람들의 반응은 그들이 고등학교 졸업 후 비행에서 벗어나도록 도왔다.
- ⑤ '성자들'은 감옥에 가지 않았을 뿐 아니라 보수가 좋은 명망 있는 지위에 올랐다.
